

Mike and Mary were enjoying tea at a café.

Mary asked Mike, "Mike, when you think of sea creatures, what comes to mind?"

Mike thought for a moment and replied, "Hmm, I'd say an octopus."

Mary was surprised and said, "Oh! Not a fish?"

"Well then, what about you, Mary?"

"I'd think of a shark!"

"A shark, huh? It's definitely strong and cool! But I also like turtles."

"I like turtles too!"

"Turtles are amazing because they can live both in the sea and on land!"

The two of them continued their lively discussion about sea creatures.

Mike asked, "By the way, do you know how many legs an octopus has?"

Mary confidently answered, "An octopus has 8 legs."

"What about a squid?"

"Squids have 8 legs too, right?"

"No, actually! Squids have 10 legs."

It turns out that octopuses and squids have a different number of legs. Mary learned something new from this.
