

練習問題4

On Sunday afternoon, Mike had lunch with his girlfriend Ami, eating hamburgers. With their stomachs full, they then headed to a shoe store. Inside the store, there were many shoes displayed on the shelves, and they were having a hard time deciding which ones to choose. Ami brought over two pairs of shoes: one red and the other green. Both were appealing, but Mike ultimately chose the cool red shoes. When he checked the price tag, it was \$30.

At the checkout, they found Mika, who was in the same class as Mike during their school days, working at the register. Mika recognized Mike and smiled, giving him a discount, so the final payment was \$25.
